1	Zach	Rubeck	zrubeck@norcalcenter.org	6/10/2004	4708 Roseville Road, Ste. 111	North Highlands	CA	95660	I would like to see the VRS service to continue for the deaf community. It is important for deaf and hard-of-hearing people to use this service for better communication. Please, don't throw this important opportunity.

This would help millions of people										
8	Angela	Foreman	AngelaLeeForeman@aol.com	6/10/2004	P.O. Box 684	Davis	CA	95617	We, the deaf need quality service in order to empower ourselves to communicate and function in today's every-changing world.

10	Brent	Jolley	brentjolle@yahoo.com	6/10/2004	130 Lincoln Way	Auburn	CA	95603	As beeing in a high level job, taking VRS away from me would only pull me back from advancing my career!! Hearing people do not like text base relay esp people in the high level profession as time is everthing and with VRS i can finish a conversation in a matter of minutes where text base relay take me three to four times longer. If you take away VRS or reduce the quality of it you are basically taking away my rights to equal access as text base relay is not "EQUAL" or as you call it functional equivalent! Text base relay is only a band aid approach to providing the Deaf and HH with this type of services. If you would like to understand my point, lets go back to rotor dial phones and the old switch board process of making a call. Would you adapt to that??? of course not, that is what deaf are going through right now and it's really unfair that our services are not in line with technology and being able to keep the level of our services equally with technology.	
Please please do not settle for less or provide "good enough" services to us deaf people.

30	Wendy	Merritt	vaultwendy@aol.com	6/10/2004	16125 kingsbury	Granada Hills	CA	91344	Please don't let it take away we need communication throught family and friends. Thank you	
31	Margie	Cooper	margie-cooper@sbcglobal.net	6/10/2004	724 Lewelling Blvd.	San Leandro	CA	94579	For many deaf people, communication via video relay service makes conversation much more equivalent to 'normal' phone calls between two hearing people.	
I am not deaf, but I work with and have friends who are. When one of them calls me I can tell very easily whether they are calling on traditional TTY relay or video relay; with the traditional relay calls there are long pauses that make the conversation often stilled. After the deaf and hearing people are connected, the deaf caller types to the operator, the operator reads to the hearing caller, the hearing caller speaks to the operator, the operator types to the deaf caller, the deaf caller responds by typing to the operator, etc., etc., etc. In addition, the deaf person has to continually translate from a written language to an oral language and back again, which adds to the unnaturalness of the conversation.										
In contrast, a call through video relay service is very similar to a call between two hearing people - the communication is more flowing and natural. Another thing that makes it more equivalent is that on vrs the 2 callers can talk at the same time, whereas with traditional relay each person has to wait for the words to go from one caller to the operator, who then translates it and gives: Because video relay is much more functionally equivalent to traditional phone calls, I believe that it is essential that vrs be avail: It is difficult enough to be deaf and have to function in a hearing world even with the telephone access provided by TRS and VRS. VRS and TRS are indispensible to our ability to communicate with family, businesses, government, health care providers and all the other vital functions of our lives. Do not curtail what little help we have.

57	vera	fleischer	aslamore@aol.com	6/10/2004	12465 nugent dr	granada hills	CA	91344	FIGHT TO KEEP VRS ANDTRS SERVICES THAT WE, DEAF PEOPLE NEED THEM!
58	Jack	Lamberton	JackLamberton@comcast.net	6/10/2004	822 Stingray Terrace	Fremont	CA	94536	vrs is wonderful communication for the deaf, please do not take away our wonderful communication.....thanks Since ASL is my native language, VRS enables me to communicate "directly" with my hearing colleagues via ASL. There are two groups of deaf people - one more comfortable with the written language of English and the other with the visual language of ASL. A great majority of the deaf people are primarily visual language (ASL) users. So please make VRS mandatory along witt TRS.
59	Shirley	Pate	pate2@comcast.net	6/10/2004	4097 Missouri Flat Road	Placerville	CA	95667	It is a MUST for the deaf to keep up with modern technology such as VRS!! How would the hearies like tv with black and white colors which is old fashioned?? Please let the deafies have an opportunity to have video phones which need VRS!

This includes the right under the constitution to free speech which includes all avenues of communication. For the FCC not to fully support and mandate VRS is to deny us as Deaf and Hard of Hearing Citizens our constitutional right to free speech via the use of our language ASL.

I still wait for it to arrive here for me to connect the VRS. I need the VRS so badly which would help me communicate with someone better or VRS interpreter would be able to interpret with one of my doctors or hearing persons or my hearing relatives. It would be more less on misunderstanding on the telecommunication relay service. I am still forwarding to get one VRS pretty soon.

115	Lawrence	Brick	lbrick@earthlink.net	6/11/2004	3017 Midvale Avenue	Philadelphia	PA	19129	Of all the relay services made available to the deaf and hard of hearing community, VRS is the most functionally equivalent service and one that most hearing will be comfortable with in interacting with the deaf and hard of hearing community in the world of business and in one's personal life. It is the service that most effectively levels the playing field for deaf and hard of hearing Americans. It must be mandated in order to maintain quality standards for this service.

Box 0036	Abingdon	MD	21009	<p>I'm concerned that cutting costs or "corners" to VRS may:</p> <p>Prevent emergency communications by creating a slow down by delayed answering services, which in turn could be dangerous in the event of emergency calls to doctors, hospitals etc, especially during times of terrorism threats.</p> <p>Cutting costs equates to inaccessibility versus hearing people who often get immediate service vs having to wait for an operator</p> <p>VRS is an important tool for the deaf community who rely on American Sign Language (ASL). This includes individuals who cannot type on a TTY , such as children, people with carpal tunnel syndrome, degenerative disc disease, MS, senior citizens, other physical disabilities, and those who do not speak English.</p> <p>VRS allows ASL and hearing individuals to have real time conversations that more closely mirror the speed and natural flow of voice-to-voice conversations.</p> <p>I respectfully petition the Commission to mandate VRS as an essential step towards the goal of equal accessibility.</p>

245	Jeff	Birchell	jbirchell@norcalcenter.org	6/11/2004	8748 Via Media Way	Elk Grove	CA	95624	The wonder of VRS is that it allows for real-time conversations that do not have the same delays between messages that users of traditional text-to-voice relay services experience. VRS conversations flow naturally and allow users to convey emotions that can otherwise not be conveyed over traditional relay services. VRS also enables people who use American Sign Language (ASL) and other people who cannot type effectively on a TTY device easily, such as children and senior citizens, to be able to communicate easily with other people by phone. Furthermore, it enables deaf people of foreign origin who are not fully acquainted with written English to make telephone calls. In short, VRS is the only telephone services that is truly "functionally equivalent" to voice telephone services used by the hearing community. We, The People, (24 million deaf and hard of hearing people living in this country), reserve the right to equal opportunities to find, secure and maintain employment, utilize educational opportunities and to seek help during emergencies. VRS can help us to achieve these goals, but recent actions taken by the FCC have all but eliminated the effectiveness of this marvelous form of t

Even when I use VCO I can not enjoy the flow of conversation and the confidence in knowing voice modulation by reading text. VRS provides a critical link between myself and the other end of the line. When I called my parents on VRS I felt very connected because the interpreter showed on her face the vocal intonation my parents used. Text relay simply can not provide that no matter how good the Operator types. Please do not delay any longer in mandating this critical, functionally equivalent choice for relay users.

I challenge all others and businesses to do the same as this is the communication wave of the future for the deaf, deafblind, speech impaired and many developmentally disabled Americans. It will also provide more efficient communications with a variety of public safety/ security, businesses, medical and and governmental organizations current and future proper computer tie-ins of live photographic transmitting equipment. Increased confidentiality and privacy compliance would be a byproduct depending on individual users at receiving/sending sites. The FCC should bring America into the 21st century by requiring all of America's phone lines and cable services be enhanced with a standardized minimum and stable DSL or Broadband data transmission speeds. We do get relay calls from time to time and now some use VRS. What a difference! No long pauses and communication is much quicker and natural. Members of this family who have English language problems are now able to call hearing people and hearing people are more willing to talk to them than if they were to use a TTY which requires absolute English capability. Please support the visual VRS system for the 80 percent of the deaf people who benefit more from it than the TTY.
400	Linda	Panko	lpanko1@rochester.rr.com	6/11/2004	61 Royal View Drive	Rochester	NY	14625	Some deaf people really depend on VRS because they cannot type good English or understand English language well. They depend on American Signed Language and facial expressions so communication by VRS is a MUST! Hearing people have more patience with VRS because it is quickest way to relay messages. Typing a message can be very slow and makes the hearing person impatience. Many deaf will not be able to make doctor appointments etc. Job hunting will be more difficult without VRS. We all deaf people are humans and have rights to equal access and equal opportunities. Do not take VRS away!!!! Thank you.

It is very disappointing that these cuts are being considered. In the grand scheme of things, the costs to fund these programs are negligible. Many of the deaf are talented, hard-working individuals. Limiting their ability to communicate with the rest of the world breeds unrest and dissatisfaction that spreads into the younger generation, causing the teen problems reported by the media for hearing kids. Face it, the deaf have enough with which to contend without government hampering a service so essential in today's world.

Also deaf or hearing children needs to learn how to develop with good english by their own functions of best education by growing up from beginning to present time than misunderstanding too much of TDD is not helpul a bit!!because they do not know how to write or read very well so we still support to keep this best way open forever.

Just a few lines to say that I want to share my feelings about how very important for us Deaf people to have this very handy things in our life by nowadays since some of us who are Deaf parents have Deaf children really must have VRS communicate much more clear than anything else as such as with TDD or TTY because of limitation of languages that most and some Deaf children who are very young that does not have any much languages to understand how to communicate by any TDD or TTY! VRS can help any ages of Deaf children to have their wide openly communicate with their parents while they are apart. Since some Deaf parents or any parents who have their Deaf children are away from their homes which is very hard to communicate and understand by any TDD or TTY. Finally, VRS really helps and very handy for us all. Another words, VRS is very important for any Deaf people to communicate with their own privates more clearly than TDD or TTY due to lack of language or lack of education? More words, Very comfortable to communicate without any misunderstand by using the VRS relay while need to call any kind of real businesses as such maybe doctor, dentist, hospital, job and etc..... th

In the past, the relay calls can be long and cumbersome but through VRS, it is shorter and the hearing callers seem more comfortable with the relay calls when they are conducted through VRS. Please mandate the VRS!!! And there are lower chances of hearing people using VRS to do fraud calls or schemes.

775	Erick	Posner	dopeylsplsp@yahoo.com	6/12/2004	5259 Cartwright Ave. Apt. 204	North Hollywood	CA	91601	We depend on the VRS for seamless conversation with countless businesses and customers across the nation. This is a God-send technology. If we were reduced to using Text-based relay, many businesses will have hung up on us, citing the fraud scams that have slowly taken over the text-based relay service. If the FCC rules against VRS, deaf and hard of hearing people will be reduced to second-class citizens. If this occurs, it is because of many factors including FCC's refusal to allow relay companies to fight against the scams, which has made countless businesses across America reject relay calls.
Thus, it is vital that we preserve and maintain the VRS with the full support of the Federal Government, including full funding.

That IS stupid, heartless, and CRUEL. Suppose, one or some of you become DEAF and you want to make a phone call and CANT, then it will be your fault for shutting it down. Then you will look back and say, "I wished I did not shut down VRS". Please, I suggest that you think VERY LONG AND HARD, what if some of you were to become deaf, or give birth to a deaf child, then your child will probably grow up to have NO friends to "talk" to, because you have shut down VRS, then YOUR OWN CHILD might rebel against you and that will look very TERRIBLE. What if it became like "hell" because you shut down VRS? It is just like tell us deaf, YOU ARE NOT ALLOWED TO COMMUNICATE WITH OTHERS. "WE FCC WANT YOU TO BE BORED AND SUFFER". That's how I look at it. Do not do anything that you will regret, please. Pray to God and Jesus Christ to help you NOT shutdown VRS. God loves you all. But GOD wouldn't shutdown VRS. If you take away VRS or reduce the quality of it you are basically taking away my rights to equal access as text base relay is not "EQUAL" or as you call it functional equivalent! Text base relay is only a band aid approach to providing the Deaf and HH with this type of services, If you would like to understand my point, lets go back to rotor dial phones and the old switch board process of making a call. Would you adapt to that?? of course not, that is what deaf are going through right now and it's really unfair that our services are not in line with technology and being able to keep the level of our services equally with technology.Please please do not settle for less or provide "good enough" services to us deaf people.

It is no wonder there is 70% of Deaf Americans are on some kinds of welfares like social supplementary income.
851	Bill	Davidson	catcusbill@aol.com	6/12/2004	3019 Halsey Avenue	Arcadia	CA	91006	First of all, we apparently lost a similar business transaction twice due to a variety of miscommunication or misunderstanding via TRS in question at the expense of a second party in the past. After trying VRS a several times with hearing people at the other end for the first time this month of June, it is indeed found marvelous and benefical, a real boon for everyone from my own personal perceptive in a long run after all! FCC, please take our word real seriously as well to respect us as Deaf Americans for our full precious communication rights after a long struggle for equality and thank you so much.
854	Glen	Turner	turnegi@iname.com	6/12/2004	3707 Goldcrest Hts NW	Olympia	WA	98502	Too often in my years of experience in working with co-workers that are Deaf the TTY has not been adequate for complete communication. The greatest effectiveness of the TTY or telereley is to confirm a time we can meet in person so we can be face to face to conduct complete communication. This creates huge delays in completing business. I am hearing and I generally am able to conduct business completely with another hearing person by telephone. It is critical everyone has access to common technology to conduct business in real time 24/7 effectively and efficiently.

Also My daughter call me thru her cell phone and she leave vrs mail on my email to tell me whats going on or where is she So I can pick her up or not to worry. I believe in VRS best and I feel more SECURED !!! And My family and friends are hearing the loves my VRS better than CRS.. Because VRS does not use GA or SK. Also VRS and I can communicate with out any problems and We use vrs and stay on vrs longer chat than we expected.. CRS I always call thru CRS they tend misunderstood what I m saying because nbr of deaf and hard of hearing does not have a good english or good details sometimes crs want to keep talking with my family or friends they are not comfortable with crs . they like vrs better so VRS and I can talk with any DETAILS with out any problems.. I demand to keep VRS and better technology VRS FOR the DEAF and HARD of HEARING.... IF WE LOSE THOSE VRS WE ALL WILL BE DISAPPOINTED , take away thier pleasure and rights.. 926	Ami	Welch	ailoki@sbcglobal.net	6/12/2004	2353 East Division	Springfield	MO	65803	I am a deaf college student in Mo. When I went to a resource center to get help in finding ajob. A VRS was installed in one of our rooms. It was awesome it was great. The deaf who cannot communicate so well with typing on a TTY were able to BETTER communicate via Visual Relay and signing. It was perfect for them. I think it shouldn't be taken away because if the hearing have other ways of commincation then WE have the right to have equal communications as they. I'm not talking about verbal I'm talking about English Spanish Foreign language services over the phone for those that do not speak english. It should be mandatory. Because we as deaf people are not just deaf. WE ARE AMERICANS. United we stand Deaf AND hearing people.

I really appreciated and still appreciate the use of Relay Services to call my beauty shop for an appt., my pharmacy for refills medicines, my doctor for any questions regarding to my health- I am a Senior Citizen (64 yrs old) as I desperately need the VRS for emergency, business or social purposes. It has been helpful since the VRS was started. I feel more independent to make the phone calls with Relay Services as I felt self-esteem. Thank you for continuing to provide the VRS, TTYs, closed/open captions and any other means of communication effectively to make the difference. I feel so comfortable to feel connected to the newer technology relay, tty, closed captioned, and other devices.

I must use my Voice-CarryOver TTY and ask the Relay Operator to connect my call, both incoming and outgoing. This service is not only necessary to myself, but to those people whom I am calling, both hearing and non-hearing. Please do NOT restrict VRS and TRS services in any way! I need them in case of emergency. I need them both during and after business hours. I am a responsible U.S. Citizen, have worked hard all my life, and am currently disabled through no fault of my own. To restrict the Relay Operator's ability to provide services is tantamount to telling full-hearing people to stop using (except Monday through Friday during business hours) their telephones, cell phones, AND any other electronic convenience that helps them to communicate. Imagine that you are not allowed to talk at all except during business hours, and you will get an inkling of what it takes to experience hearing loss in a society that expects everybody to hear.

1048	John	Coffey	usdeafchess@aol.com	6/12/2004	1421 Charleston Dr.	Garland	TX	75041	I urge FCC to make VRS mandatory so it will continue to serve us well. We deaf people found it to be a very invaluable way of communicating to others with much ease, like the hearing people could only use their voice instead of using a very MENIAL task of typing with our fingers all the time. Thanks.

It is great to contact with business people. We use VRS almost daily. Some deaf or hard of hearing feel uncomfortable or unable to communicate with relay via TTY, but with Videophone VRS make it much easier to understand communicate. We could NOT live without VRS! Thank you.

1167	Jon	Mowl	fbi005agent@aol.com	6/13/2004	11087 Silvertree Court	Fishers	IN	46038	It is a wonderful opportunity for me to stay in close touch with my hearing girlfriend and her family. I feel comfortable making those calls to make plans with my hearing friends. My hearing friends like to use vrs to contact me. They do not feel self-conscious like Sprint online relay. Sometimes the person does not speak clearly and lead to misunderstanding.ZPLs expand the quality of service and hours so I can make calls without having to wait for good 15 or 30 minutes before I can reach to order pizzas, etc.Jon

1180	Alexander	McLin	amclin@email.unc.edu	6/13/2004	105 Maxwell Rd	Chapel Hill	NC	27517	I'm glad to see that people are taking an active role in protecting their interests and to make the government recognize that they have a responsibility to deaf people as well. It's so important to be an active and participant citizen otherwise one would miss out on making sure his voice is heard. Ever since VRS was developed, hundreds of deaf people have come to rely on the service to lead a productive life. To cripple that service by not mandating it would do a great injustice to deaf people's lives.

1301	Phil	Glick	Philphoto53@aol.com	6/13/2004	600 Northern Way apt 401	Winter Springs	FL	32708	I believe in VRS work fine for deaf and harding hearing. Because of expression show what their feel which not show up in TDD. And More quick time to chat with this than TDD. Why hearing people have cell phone and have everything they can use. What about deaf people use? Maybe take so long to get better for deaf. Can we afford to wait for?
1302	Sharon	Hubbard	shubbard@socket.net	6/13/2004	8393 W. Hwy 60	Mountain View	MO	65548	I have seen the VRS and I love it very much and it is really easy to communciate each other and I know that there have many ways to communicate, For example: the person cant afford to drive far away which she/he dont have any kind of money to put gas into the car for travel which she/he have not seen them, instead of use VRS to see the person which she/he can see them again and pretty sure that she/he communicate them with a very good news for a long time. I think that it is very worth to use VRS. Please keep that mandated for VRS in our future. I am considering to get one for ourself someday when we have a good cable. Right now we dont have cable and we use antenna for now, but someday we will get one like that.

Many of the individuals I work with have additional disabilities such as mental retardation or mental illnesses. These people have minimal language skils and current relay services do not meet their language needs. Video relay services are much more effective in communicating with these individuals as well as with well educated deaf and hard of hearing individuals.
1325	Martha	Hamrick	ncbcdmhamrick@aol.com	6/13/2004	1057 College Ave.	Shelby	NC	28152	Please do continue this service provide for the deaf to enable to express what we need to say in our natural signing as well as our first spoken language through the hands. So the hands of the deaf that speaks out is an spoken/sign language expression that is made of God'simage and through skilled interpreters can enable communication effectively by VRS. Please never take this away from us.. VRS is a wonderful fulfilling tool for comincation of the deaf equally as hearing using their phone or cordless phone or cellphone. 1508	EMOGEAN	ENGLE	ZOYA405@AOL.COM	6/13/2004	630 HURON AVE	CAMBRIDGE	MA	02138	The hearing people have access using of their phone in reaching someone in case of emergency or giving an emergency message at nights or calling in sick before the working hours. We the deaf people are facing the limit access of using the VRS. When theres an emergency arise at night, who do we contact and how difficult forus to reach the hearing people directly those who do not have a tty. I think its important to have equal access so that we can be served well whenever we need to reach any person who do not have a tty and need to speak to them by a help of a video relay service operator that know our language anc are capable of delivering the message. Once again, requesting it to be served for 24 hours to meet our communication needs when theres an emergency arises at nights Thank you for your time reading my comment.

1561	Kiri	Ingram	Nodiar14@aol.com	6/13/2004	19523 15th ave ct. E	Spanaway	WA	98387	VRS must be mandatory! Yes, We need the vrs to communicate our society serve, our equal rights is fair what we benefit our sources to use this vrs to help our deaf growth in business. Thanks Kiri Ingram
1562	Timothy	Hickerson	hickerst@aol.com	6/14/2004	1031 Bradford Circle	Lodi	CA	95240	Before we read the article about the Department of Education under the Bush Administration thru having a panel of decision making to downsize the Closed Captioned of 200 TV programs. I personally make effort of Petition against the idea. I have been actively against it with a petition you can sign also at http://www.petitiononline.com/mod_perl/signed.cgi?ca10qph&1 . Do visit my page as we are heading in the same direction about our Equal Accessibility. I am currently producing a song called "No Words Are Easy" which would soon come out in a Musical demo against Downsizing Closed captioned TV Program. Now I see that FCC or whether it be the same Bush Administrative Action to cut off Programs to save monies for Political reasons. Our Human Rights shall not be played against to limit our Equal Accessibility. I strongly am against the idea of cutting back on VRS Equal Accessibility as well. Be it that I am now a Deaf Activist against the Bush Administration. They don't know what the heck they are doing! I will play "No Words Are Easy at one of our nearest radio station to "shock the Monkey" and be the voice thru out America. This is just be getting "Ridiculous"! I might try to do something about VRS soon as well!

Now what happened to all of that? You (FCC) take all our rights away from us. VRS is very important to us for our fast and convience conversation goes smoothly just like talking on regular telephone conversation. We need VRS need to provide full rates for all qualified professional VIs to answer our calls sooner and 24 hours 7 days a week!! So please let it happen to pass the petitions thanks very much!! 1671	Claudia	Glenn	caglenn@ameritech.net	6/14/2004	612 Buckingham Place	Libertyville	IL	60048	I urge you to make VRS mandatory and expand the hours of use. I have found VRS to be quite helpful, especially in understanding the tone of the person I am talking to. When I can understand that correctly, then I can respond in an appropriate manner and he conversation is more comfortable for everyone. Also, my parents are in their 70s and are uncomfortable with conventional relay. The speed of VRS makes communicating with my parents much easier. Thank you.

1875	Ivanito	Maldonado	Ivanito7@aol.com	6/14/2004	16352 South Brentwood Street	Olathe	KS	66062	I'm profound deaf when I'm using VRS.It changed my life and removes the communication barrier with hearing people world. There is no reason why you should cut down the VRS rate and cause quality of service to suffer. Quality is VERY important when using VRS. I got a deaf family who use VRS often. Please think about it twice before you act on this issue.

1877	David	Hearty	stargazer28@comcast.net	6/14/2004	5383 SE Rancho St.	Hillsboro	OR	97123	The videophone system is FAR superior to the existing TDD relay system because it enables us to see each other and talk to each other thus bringing the Deaf community closer to each other. Also, when using the interpreter to talk to voice calls, very little misunderstanding ensues because manyof us are not very versed in English as it is not our primary language. Also, great deal of time is saved because when options are called out, we can immediately respond. Please consider this petition to mandate the service

1956	Tiffany	Freymliller	tiftwn1@yahoo.com	6/14/2004	2467 Anna Drive Apt 2	Santa Clara	CA	95050	VRS is a vital tool for me both at work and at home. By limiting the hours and availability of VRS, You, the FCC is also stifling my ability to communicate directly with others. I too have a right to EQUAL communication with others. VRS is able to provide that. Currently with VRS, I am able to talk directly with clients, family and friends, in a smooth and natural conversation, without having to pause, take turns, correct spelling errors or worry about by grammar on a text telephone as with traditional relay systems. I am also not ignored, cussed at or hung up on, as often happens when using CRS. Unfortunately little or no efforts have been made to educate the general public to the needs of those who cannot hear. VRS is a valuable asset to the deaf and hard of hearing community that levels the playing field when it comes to telecommunication. For the FCC to question whether it should be mandated is an insult to those of us who have fought so hard for equal rights and opportunities when it comes to the needs our community.

Official NVRSC Petition List									
2113	Cine	Frederick	CajunCrazyGal@aol.com	6/15/2004	550 Eraste Landry Rd. Apt. 131	Lafayette	LA	70506	VRS is very important key for the deaf and hard of hearing people to understand better than relay on the phone because it is better communication than misunderstanding. Also my family don't hang up on me when I use VRS because it is much easier for them understand than on phone since they don't have any patience with relay. so PLEASE Keep VRS on as we need them for the service. Thank you.
2114	Kevin	Lynch	LOVECODAS@aol.com	6/15/2004	2493 Abaca Way	Fremont	CA	94539	I support this bill to such extreme that I now offer myself up to the video Relay Services, my employment, as a relay operator.For it is there that I feel I can do the most good. Thanks to all of you who helped organize this bill, and for the great service you are doing for the Deaf community.I thank you, and my parents thank you.

Let's come to be more specific, We finally come to meet our needs by communicating our true feelings, whenever we have the quality of the vrs service without any problem. So please remember that we obviously should have the same quality of life like everyone as well.So please do not take away our rights that we did not have in the past.

Video relay has paved the way for the Deaf community to gain access to jobs and keep them, to communicate with family members fluently rather than in the written or typed language that tends to make them sound or appear retared when in reality they master ASL which is their native language. NVRCs interprets this language therefore affording the deaf community the ability to communicate just as the rest of the hearing community.

I don't understand why an opportunity to improve the lives of so many is being denied. I have used VRS personally and as a hearing person contacting a Deaf person I felt it was a wonderful experience the person who was the interpreter truly had an understanding of Deaf culture and the conversation flow was of no comparison to realy service. Otherwise, we wouldn't be informed about some of the hearing people (and deaf/hard-of-hearing people) who gave positive compliments on VRS. VRS, without a doubt, will serve United States of America and the world well by providing the best service possible by saving time, money and resources as well.

2491	Johhn P	Zakutney	jpzakutney@hotmail.com	6/15/2004	1115 Fox Hill Dr. Apt. 225	Monroeville	PA	15146	I beg you humbly to not forsake our handicap and the great technology of the times to do the greatest good, under God, that does not require much effort to ... to make VRS a mandated service. Sadly how we wouldn't need your, the Government's help if this nation was indeed a great humanitarian one. So the Government's lead in the regard is indeed needed. In advance I give my sincerest thanks.

2495	Heidi	Feldman	moonswirls@comcast.net	6/15/2004	3685 Starboard Lane	Snellville	GA	30039	I enjoy the freedom that allows those of us who are Deaf to have improved technology to communicate successfully with our hearing counterparts. It is important to me to be able to see the interpreter because I know they are expressing my phone call in whatever tone I am using. For a long time we had to rely on tty/tdd's to make our calls. The relay operators do not know the tone of what we are trying to express through the use of words because they cannot visually see our conversation. I am extremely grateful, thankful and very appreciative we have Video Relay Services. The interpreters are highly qualified and very professional with all of the calls I've made thus far with them. I have to pay for interpreters to help me out at doctors offices because doctors will not provide an interpreter. It costs me anywhere from \$70 to \$90 for 45 minutes of their time to interpret the doctors' conversation and my conversation as well. This is how interpreters make their living. Video Relay Service is obviously growing faster than anything people have ever seen before. Deaf people have heard nothing but raving compliments from being owners of videophone 100 and how exceptional the relay operators are at helping us make o This will help deaf and hard of hearing people who have a natural language in American Sign Language (ASL). This will help their communication with speed of talking. If typing on teletype machine, it is slower than using ASL. Not only that, I have a deaf uncle, 48 yrs old, and he is k/1st grade reading level and not be able to use teletype machine. He is so happy that he can use VRS where he can understand his language than English. This is only way for those people like my uncle who can have this access to communicate with hearing people over the VRS. If no VRS, there will be no access for those low-grade level people. Please keep VRS which is worth it!

And I have to agree, that VRS is more functionally equivalent on par with a hearing persons conversation than the tty relay. Its more important that the Government listen to what the Consumers say is the "best fit" for them. I support this petition to mandate VRS.

One recent VRS-based conference call I conducted involving six professionals around the country to discuss an upcoming project for about an hour. When the cable service was inadvertently disconnected, I had to resort TRS to wrap the meeting up and it was never the same. These same folks were brainstorming at the speed of 150+ wpm and the operator can only perform typing at 30-40 wpm with a series of typo errors! You get the idea. Please support the VRS equality.

We can use Vrs to call 911 for emergency as very easy for deaf and hard impaired to communication to face to face by tv or computer as not misunderstanding as when deaf and imapired call the 911 but 911 service can be misunderstanding as i don t like to call 911 ty itself because wait too long and too much trouble communication like repeat.. I want Vrs open 7/24 and can use it any time as by ADA law as fair with hearing ppl.... very truth Troy

I recomanded to set up a 24/7 for relay(vrs) so deaf can make 911 calls and emergency things and its better instead of calling on ty it takes too long too long... Um.. there is alot of things that was wished to be improved.. the speed sometimes makes the pictures blurs and wish that it can work out with anything and everyone wants better future with vrs and have 24 hour service same idea of relay its 24 hour.. everyone wants communication through video because its easier to understand than typing on ty to make the relay or the person on 911 to understand whats going on what the sistuation. i think its best to be as equal as hearing people i think deaf should have a 24 hour service(vrs)so we can communicate better than on the ty some deaf people dont type good as well as others they sign easier than writing in words.. and plus i want to know if u can improve on having vrs to answer the phone instead of us being waiting for long and wai for relay to call back.. i like fast like immediately and deaf people like to do that..and they just dont want to wait umm U know how sometimes we dont have phone and we use vp for leaving message why not have it on vp instead of doing thru email.. whi

2628	Joseph	Innes	jayinnes@comcast.net	6/16/2004	628 Chestertown St	Gaithersburg	MD	20878	The lack of service at certain hours, and also the lack of a prompt response from a VRS interpreter, and at times the lack of service has imperiled my personal wellbeing and that of my family. I recently was unable to contact a medical service professional while my wife was undergoing issues with kidney stones. I gave up after waiting for the interpreter more than 20 minutes. Because we could not access our HMO my wife had to go to an emergency room where she spent almost the entire night awaiting treatment. This all would have been avoided if a VRS interpreter was available and able to respond within a reasonable time.

It help both hearing and deaf consumers to make more effective way to communicate by use VRS than text message. VRS are just simple like you pick up on the phone and begin to talk with it. VRS is realistic and idealitic to use communiacte any one in quick time and more convience to communicate. I am sure you need it to communicate and realize it is true to use it. Think of others. It is perfect tool for everyone to use VRS than traditional relay services. I am favor VRS than traditional relay services. It will be obselete or no good to have traditional relay services with less five years. We saw VRS are benefit for everyone include yourself.

2725	Leslie	Riggs	skyyeyes@new.rr.com	6/16/2004	407 W. Foster St.	Appleton	WI	54915	I use two-line voice carryover with text-based relay. It's not the same as a normal hearing conversation. It's close, but it's not good enough. VRS allows a much more natural flow of conversation, and with the two-line feature, I am able to speak to people while receiving their speech through a sign language interpreter. This interpreter gives me expression showing tone of voice and other feedback that gives valuable information about the conversation I am having with the person. At this time, VRS is the best technology available to enable deaf and hard of hearing people to use telephone communications in a way that is as equivalent to their hearing peers as possible. And we should be able to use VRS any time, the same way the hearing population can pick up the phone any time: that's equal and equivalent access. Please mandate VRS. It's only fair.

Receiving VRS calls are far superior to CRS calls as it is in "real time" and sounds like a 'regular' call. It makes every call, from ordering a pizza to talking to customer service representatives to making a business calls to calling friends and family, like most of the rest of the country experiences. No more 'hang-ups' from people thinking it is a crank call. I urge you to make this service mandatory for the millions of Deaf and Hard of Hearing in the country.

2751	Billy	Allaband	wmallaband@aol.com	6/16/2004	612 West 20th St.	Wilmington	DE	19802	FYI, most of my friends and I have been waited for VSR company supposed to come over my place and their places to install the equipments for VSR to hook up with TVs or Persona Computers. Now you know that why the services shows pretty lower. Please let's patience and wait till next 2 years the service will increase more and more. Obviously, proved that all hearing people don't really know nothing about Deaf culture. It's wrong idea to make decision to cut the hours to services for deaf's needs. I am still wait and wait for VSR equipments to arrived for 2 months nowdon't push deaf people back to Dark life again..

I think a lot of deaf people who have (no offense) have "limited English" will benefit a lot from this kind of service. Not only that - but it's definitely a time saver. Instead of using the relay service and having to have the operator hang up on you and redial again and again for the specific option you wanted. I think this is a wonderful technology for all of deaf people.

I have had the major fustration of hearing people out right saying that they are done taking to me because of the time it takes to communicate in this way.Other times people hang up on me thinking it is a collect call or that they just do not know or understand how to communicate in that way. With VRS services the calls go much faster and more clear in communications. People hang up less now and I feel good knowing that there are really a person I am taking to. The interpreters are very helpful and assist in communication difficulties with new callers and new recipients (those receiving the call). I have used the quick call features of Hamilton Relay also. This is wonderful too. The cost of a TTY or TDD is so expensive in comparsion to already having a computer for school and work. I think it is in the best interest of all Deaf,deaf,and Hard of Hearing who use sign Languages,ASL, and other sign systems to have the access to their prefered mode of communication and in such are able to communicate more clearly as well as to be able to understand the content of the calls through this method. 3129	Henry	Clark	clarkland@bellsouth.net	6/17/2004	5027 Wycliffe Dr	Stone Mountain	GA	30087	Thank you for hearing from us. VRS is a much more efficient tool for Deaf in communication. Because it takes less time to communicate, it is also a money saving tool. Typing all conversation is lengthy and misunderstandings are huge, because the Relay Operators often do not understand the deaf, are unable to help the hearing, and often cause the deaf to appear stupid or uneducated. Also, awkward situations between the deaf and the hearing are caused by the Relay Operators.
VRS has helped a great deal because the operator and the deaf can see each other, lessening the chances of misunderstanding.									
Thank you,									
Henry Clark Stone Mountain, GA

3227	Chris	Roeback	CGRoeback@netscape.net	6/17/2004	480 Kiely Blvd.	Santa Clara	CA	95051	Many of the Deaf people are having hard time to make or typing in right english language of if we had to call CRS instead of VRS because many of us that english is our second language. Especially those business people may not having enough patience while we are typing during on CRS calls. VRS will change that and make us more equal opportunity to get business contacts. Also I have to contact with my relatives and all of my relatives lives other side part of USA. I need to contact them about my mother old age problems and need help. VRS would be very helpful for me to make them more understanding what I have to explain in ASL because it is my basic or first language to communicate and much easier for me to explain.

VRS is very important communication for us. Human Responsibility! Also some deaf people really depend on VRS because they cannot type good English or understand English language well. They depend on American Signed Language and facial expressions so communication by VRS is a MUST! Hearing people have more patience with VRS because it is quickest way to relay messages. Typing a message can be very slow and makes the hearing person impatience. Many deaf will not be able to make doctor appointments etc. Job hunting will be more difficult without VRS. We all deaf people are humans and have rights to equal access and equal opportunities. Do not take VRS away!!!! Thank you.

3284	DEBRA	BENNETT	TROUBLECLOWN58@AOL.COM	6/18/2004	850 MAURY RD. LOT 76	ORLANDO	FL	32804	I THINK IT IS NECESSARY FOR US TO HAVE THIS AS IT IS FAR MORE BETTER FOR US TO USE ALONG WITH THE RELAY AS WE CAN COMMUNICATE MORE BETTER AND HAVE MORE BETTER UNDERSTANDING AS WE LISTENED WITH OUR EYES BY SEEING BODY LANGUAGE AND EXPRESSION AND THE INTERPRETER COULD BE ABLE TO EXPRESS OUR FEELINGS BY SEEING US WHEN WE NEED TO COMMUNICATE WITH BUSINESS OR PROFESSIONALLY..... I THINK THIS IS THE BEST GIFT FOR SOMEONE WHO CAME UP WITH THAT IDEA AND I THANK GOD FOR THAT AND IT IS THE BEST THING FOR ALL OF THOSE WHO CAN'T SPELL ENGLISH AND KNOW ENGLISH BUT ONLY ASL AND TO USE FLA. RELAY - IT STINKS AS TDD RELAY DO NOT TELL EXACTLY WHAT WE SAY OR TELL US EXACTLY WHAT THEY SAY....PLEASE LISTEN TO US AS WE REALLY NEED THIS AND JUST THE SAME AS THE HEARING WITH THE CELL PHONE AND ETC....SO GIVE US THIS WITH NO CHARGE..

3335	Guthrie	Nutter	g_nutter@hotmail.com	6/18/2004	PO Box 1064	NY	NY	10116	Unfortunately, many deaf people do not have access to communicate their needs via written english form; They need some kind of visual channel for their communication needs. Suppose an emergency situation (a 911 number was needed) and they couldnt contact support services (fire, police, medical) for whichever emergency was occurring, solely on the basis that VRS was closed due to 'business hours'. This is a TORT waiting to happen. Im sure the operating costs associated with maintaining VRS on a 24/7 basis would be cheaper than a 'solution' that required expensive litigation. Please explore options to market this service, and have a whole flotilla of advertisers to advertise their services on the sidebars of this website---all in the purpose of using advertising revenue to support VRS operating costs. There are options. Use them.

3346	Donna	Galati	spamugh@yahoo.com	6/18/2004	2625 Weedy Pt.	Winter Park	FL	32792	How would hearing people feel if telephone service was only available during business hours?
3347	Saverio	Galati	abeeceewontuthry@hotmail.com	6/18/2004	177 Stefanik Rd.	Winter Park	FL	32792	This is a travesty that we can not have VRS 24/7 as people with telephone service do. If hearing people had to type in everything they say in a telephone call and not have the freedom to use their own natural language at the same rate of speed as they are accustomed to, then they would be complaining very loudly about that.

3359	Stefanie	Saltern	icejunkie74@hotmail.com	6/18/2004	7534 Tree Lane	Madison	WI	53717	I am severely deaf and have benefited from use of video relay for conference calls in personal and business settings. This is the only relay that performs this type of call and allows full language comprehension for the deaf since ASL (American sign language) is not a written language. I have seen a decrease in VRS quality and availability. I need VRS to be able to have full telecommunication access at home and at work. Please make no more cuts in the VRS rate until functional equivalency is achieved and until video mail is made available. Thank you.

To be able to express oneself in one's natural language is extremely important to all people. TRS does not encourage this process. English is not the natural/first language of many, many deaf and hard of hearing people. VRS allows the deaf/hard of hearing to express themselves naturally through sign.

Typing has certain strains and signing is more natural and quick to interrupt and cuts the call times by more than half! Calling to order a carry out took 2 minutes when signing compared to 6-10 minutes when typing. We still need to preserve typing at times when recording a business discussion and we find this flexible when it's done over the internet that also allows video.

Using TTY relay often receive a lot of obstacle because during business hour, hearing people would say "I do not have time for this so call back later" and hang up. Why should we be second to hearing customer? With VRS, the speed would be equivlaint to hearing people talking on the phone, therefore, there would be no excuse for hearing people to say he don't have time for this call. I am a business owner so I deserve equal customer right as other hearing customer so I want VRS for the best interest in my business!

3588	Mark	Landreneau	marklandreneau@comcast.net	6/20/2004	4021 38TH AVE SW	Seattle	WA	98126	VRS service is, in a word, WONDERFUL! This technology is a huge advance for communication for Hard of Hearing, Deaf and Deaf-Blind people. In comparison to the regular relay service, VRS is a million times better! The regular relay service is still a good and needed service as many people do not have access to computers.
									To share my perspective on the benefit of VRS I'd like to give the following example. Imagine that hearing people could not use the telephones anymore. Having access to VRS has made making telephone calls accessible in a way that was not true before. With VRS, telephone access is more equal.
									Another aspect of VRS is that it provides a way for Deaf and Deaf-Blind people to use their native language. It takes away the need to try to type in English, which is many Deaf peoples second language. Being able to communicate naturally is an incredible benefit and supports Deaf people and our Deaf culture.
									I have also noticed that through video relay interpreters it is possible to manage my way through automated menus such as, "Press one for customer service, press two for payment issues, press 3 for ...". I've found trying to use the regular relay service Support to have VRS. Because of foreign students have difficult to use try and like to use vrs better.

I help deaf and hard of hearing in many ways. When I introduced them to VRS, they couldn't believe their own eyes. They think it is wonderful that we have that kind of technology for deaf and hard of hearing. They felt that they can make the calls on their own than coming in for help. It is a good chance for them to do things on their own without help. Please keep it up! Even, I use it- and I really love it!!!

Official NVRSC Petition List									
3962	Mary	Morris	mamorris@rci.rutgers.edu	6/22/2004	68 Suydam Avenue	Edison	NJ	08817	Currently, both the deaf and the hard of hearing benefit from VRS - mainly because our "eyes" are ours "ears".
For some of us in this population - we can lip read and some of us in this population can read body language and still others can (see) understand both - so if we can "see" with the help of VRS - it is a way for us to communicate in the hearing world.									
In other words, we need VRS as a "seeing" aid for the deaf and hearing impaired population.									
We have come so far in terms of technology for the deaf and hearing impaired - and since we the baby boomers are living longer - more people will be in need of VRS in the not too distant future.									
So, keep VRS as is.									
Thanks

However, I know ASL, am involved in the deaf/HOH community, and have many friends who use the VRS service. I have also used the TTY/relay service at my place of business many times to communicate with members of the deaf community. Frankly, I am appalled that any government would take away the fundamental rights of a deaf/hard of hearing person. They deserve this service free of charge!

What would you do if there were no more "hearing telephone" services? How would you operate? What would you do? Are we going back to the old days of the past when telegraphs were used?These are things that you and the matters highge need to consider. How our lives would be changed, if we didn't have these services. Well speaking for the deaf, I AM SURE THEY FEEL THE SAME. Deaf people are NOT substandard, and deserve the same respect and ability to schedule their own appointments, chat with friends and families, discuss issues with lawyers, and just have the same access you and I do. I pray that you will strongly reconsider by placing yourself behind thier ears. Thank You.

The FCC has already lowered the rate last year, which has led to numerous and ongoing consumer complaints about the deteriorating quality of VRS. 4083	Heather	Gerber	HeatherGerber@hotmail.com	6/23/2004	314 Valiant Drive	Rochester	NY	14623	Video Relay Service (VRS) is the first service that provides TRUE access in the world of telecommunication to the deaf community. Sure, we have TTY (TRS), but it is not an efficient service. VRS is more efficient with providing access. It is also vital to our community in providing on going jobs for sign language interpreters. Please do not cut VRS.
4084	Elizabeth	Greene	eligreene@aol.com	6/23/2004	1154 N. Curson Avenue	Los Angeles	CA	90046	The Video Relay Service is far more efficient and effective than any other means of relay or direct communication methods between deaf/hard-of-hearing individuals and the hearing community using different languages. The instances of misunderstandings on the part of both parties is greatly reduced, and the unnecessary time expended and inconvenience of cross communication is virtually nullified. I have personally witnessed numerous examples of improvement in the quality of living for deaf/hard-of-hearing individuals, as well as a significant upleveling of their equality and effectiveness as consumers and citizens. VRS has made this possible, and any cutbacks in the services already provided would be shameful. Contrarily, funding for VRS services should be carefully increased with monitoring and judiciously allocated to ensure the consistency of quality technology and interpreting services.

4236	Kyle	Parke	parke.10@osu.edu	6/25/2004	2704 Collinford Drive Apt. A	Dublin	OH	43016	As a deaf working male in the state of Ohio, I would like to take a moment to discuss with you the potential funding of a highly effective program that is in danger of being cut.
									The video relay service has improved the communication options available to deaf broadband users, and has in many instances made better employment opportunities available as well by improving communication access. Further cutting of the VRS project funding would only result in less quality, longer wait times, and in effect undoing all of the progress that the project has made. The FCC should strongly reconsider reducing the funding in favor of continued progress on the project.
									I can attest to this program actually improving my job. Clients now appreciate the speed and reliability that have come as a result of using the video relay. To step back would be a dramatic error on the part of the FCC.
									As my elected official, I am expecting you to voice my opinion so that it is heard, and heard loudly. Let's save the Video Relay Service from further degradation.

Treating the deaf and hard of hearing population as a second class citizen is no longer acceptable nor tolerable in this era. Enough is enough. VRS is an incredible tool that will benefit everyone, including those whose English skills are minimal. It allows for a fluidity of communication exchange at our pace. Signing is a natural language just as much as speaking is, not written. VRS makes the most sense to me and it puts both parties on an equal footing, in my opinion. In addition, having qualified interpreters available in our daily lives is like finding a needle in the haystack. Fortunately, many interpreters provided by VRS are top notch in order to serve each and every individual effectively, unlike many interpreters in our daily lives one on one. The people employed by VRS seem to understand the dire need for highly skilled interpreter both expressively and receptively. They are a great example of what needs to be done by interpreters in any profession. VRS is hitting two birds with one stone by providing equal access to deaf and hard of hearing population as well as sending a message to everyone that hiring a qualifie

As an interpreter, I have been witness to the extraordinary impact VRS has made on Deaf and hearing users. Family members are now able to communicate on an deeper intimate level, due to the improved communication access. Deaf business men and women are able to conduct business in a professional manner. VRS allows Deaf users the ability to exchange very critical information with ease. As American citizens, Deaf people deserve the same high standard of tele-communication access as hearing people. I ask that the FCC continue to support VRS and mandate the use of this valuable service for Deaf citizens. Thank you for your time.

My mother and aunt are both deaf and use the VRS service and truly love it. In the past we used relay and this one is just like speaking to another hearing person.Without this it would truly be a tremendous waste. Please continue to support this VRS system and allow us to have continuous enjoyment of a normal and fulfilling life. Thank you,Mary

I have seen all kinds of individuals, all the way from company executives to foreign born people who are Deaf benefit from the more level playing field of telecommunications that video relay provides. Furthermore, cuts in funding have led to cuts in staffing in some VRS centers, and interpreters are in danger of overworking and physically damaging themselves. We already face a shortage of qualified sign language interpreters. Please don't make this problem worse. Thank you for your attention to these concerns.

I really love this service because I could express my first language to develop a strong relationship with the hearing communities. Video Relay Services (VRS) is wonderful to use. I want to see it become an important real-time communication service. The VRS is for me closer to functional equivalency than other telecommunications services. Please do not allow the FCC to further reduce the VRS rate of reimbursement until it becomes available 24/7 with high quality services and accessibility. We want to say thanks for inform us about this struggle. we will pray that VRS to think about how are the hard of hearing and deafies need this important and please do not remove or close VRS. Our relatives and friends love this easy communicating and more expressing their feelings... Prevent the misunderstanding communicating each other through the TDD... VRS is more showing expressing their feelings by ASL through the hearing people's English talking. It helps deaf people understand better. Also Deaf people needs their eyes contact by communicating through the Videophone. Our prayer is for VRS needs to think about it to keep running as communication with Hard of hearing and Deaf work thing out. Blessings.

4654	Eva Maria	Brancewicz	Ebrancewicz@stavros.org	7/2/2004	262 Cottage Street	Springfield	MA	01104	I have been using Video Relay Services (VRS) at my work a lot to hearing people, agencies, etc. Hearing people like VRS so much. They feel really comfortable to communicate with Deaf and Hard of Hearing thru VRS. We can't turn hearing people away from us if we have no longer using VRS! They liked VRS so much better than TTY Voice Relay. VRS is the one to communicate back and fourth faster than TTY Voice Relay. VRS save us a lot of SAVE TIME. TTY Voice Relay always hung up after the record and it was difficult to redial again to say which press # nbr then start all over again, etc. It was very frustrated. The most important is our Communication Access. Please do not allow F.C.C. stop our communication access via Video Relay Service (VRS)!! I support VRS 100 Percent because it doesn't have a barrier to us! Please keep VRS Communication Access on. Thank you very much!
4655	Sandra	Slater	slaterclan@juno.com	7/2/2004	1413 Long Creek Way	Roseville	CA	95747	The day I found VRS was an emotionally-charged day!! I am deaf, but able to speak. VRS has opened my world tremendously and every single person I have used VRS with LOVES VRS. There's absolutely no comparison with communication via TDD. TDD is cumbersome, slow and archaic. Please, please provide VRS as a mandated service.

4670	Ila	Sachs	isachs@vcccd.net	7/2/2004	5017 Canoga Ave.	Woodland Hills	CA	91364	VRS is very important for the Deaf community because many Deaf have a difficult time having a telephone conversation through text phone (tty) only. Written language such as English is a difficult challenge for them.
									VRS allows the Deaf community to use ASL, their native language, and have equal access to information just like the hearing community. Imagine if you as a hearing person had to rely mainly on text messaging for your telephone calls? That is not your natural means of communication is it??
									In this day and age of technology, there is no reason why VRS should not be mandated! The Deaf community has a right to EQUAL access!!

4672	Ella	Lentz	emlentz@pacbell.net	7/2/2004	25321 Morse Court	Hayward	CA	94542	VRS is a much more effective communication tool for the non-signers that I have contact with thus they and I do much more business (and more natural and pleasant communication). Non-signers who I contact often have great praise for VRS over text relay service. Only drawback is that Internet access and equipment isn't as accessible everywhere, so I have to resort to text relay and have seen the big difference. Please ensure that America provide ALL of its citizens (including deaf people and our non-signing contacts) with the choice of the best possible and most updated technology like SOME of its citizens currently enjoy. Thank you.
4673	Lori	Bianco	loriita@comcast.net	7/2/2004	7315 N Damen Ave	Chicago	IL	60645	VRS sure is way much better than tty because it takes forever to use relay by answering questions if I use any teleserve. Using VRS makes it faster for me. I don't need to think of a word to type in to help relay to understand me. VRS understood my sign language and interpret it correctly. I love it!

4790	Julie	Smario	Juliesmario@comcast.net	7/7/2004	6129 Mt Olympus Drive	castro valley	CA	94552	To Whom It May Concern,
I am writing on behalf of DeafHope, an agency for Deaf survivors of domestic and sexual violence. Although I am writing about our services, the points I will make also apply to the Deaf community in general.									
Deaf survivors who come to DeafHope for services bring with them an extraordinary level of stress due to domestic violence and sexual assault in their lives. It is important to DeafHope to see that Deaf survivors are not "revictimized" because of additional communication barriers in the many systems in our society that are designed for the hearing population.									
Deaf survivors of domestic and sexual violence benefit greatly from Video Relay Services (VRS) at the DeafHope office. VRS has empowered them to make their own phone calls to get emergency shelters, legal help, and other support services which would not be possible with Telephone Relay Services (TRS).									
Deaf women survivors who are foreign-born have felt a great sense of independence. They are able to advocate for themselves by making their own VRS calls using sign language without worrying about the barriers of written English as required									
Some Deaf survivors have learning disabilities such as dyslexia or developmental delays and therefore cannot benefit from TRS

That is last hope to solve among hearing employee who still use cell phone and talk faster in order to finish faster pending on compition with other companies. VRS reduces hours into fifteen minutes with the health insurance process rather than using TTY method. Be sure to enable firewall and use Instant message with vendors and hearing employee daily. Reanalyze several time and talk with us twice before determining. Sam

I think it is THE BEST service for the deaf. I don't know anyone who would go back to traditional relay after experiencing VRS. My family absolutely loves the service. It saves time, it flows smoothly, you can have a normal conversation. There's no bothersome "go ahead". There are so many other positives. If VRS was mandated, we would be able to be open all the time to help anyone who felt like making a call.

5057	Emily	Hoyer	emily.hoyer@dcara.org	7/14/2004	P. O. Box 14379	San Francisco	CA	94114	VRS allows for simultaneous, natural conversations, with each party using their native language. Text-based relay using a TTY is inefficient, awkward, and most importantly, NOT functionally equivalent to VRS. VRS must be available 24/7 to ensure equal access for Deaf and HOH people.

This allows the Deaf to use their own language for clear communication, instead of relying on English, which is not their native language. I should be their choice which type of communication they choose to use, whether it is traditional relay, or video relay.

I have seen with my own eyes the blessing this technology provides to individuals who are deaf-blind, deaf or hard of hearing. Many individuals have come out of the shadows to finally enjoy, laugh and share a comprehensible conversation in their own native ASL. Please continue to fund this wonderful technology and build bridges of communication equivalency among the deaf community and their hearing counter-parts.

For an example, when I make call to Bank, card service center or others, they have all answer machine by choosing numbers of which dept. If I use TTY, the relay service operator have to hand up and redial to select the number of which dept. as I request. As for VRS, I can read the fluent of sign, then immediately give VRS to select the dept. without redialing.

I am the case mgr for the Deaf and Hard of Hearing in Milwaukee, Wisconsin. They are very happy with VRS due to many different reasons; arthritis; mental illness; AODA. It's much faster and easier to use VRS. Personally, I use VRS everyday to save my time and I don't like to use relay because of automated voice and I have to re-dial again and again. My name is Michael Hays and I am deaf. I am a financial advisor with Morgan Stanley. I strongly want you know that Video Relay Service (VRS) is extremely important to me. I am sure you know that the communication is the one of the important tools for any business. Therefore, VRS will be very helpful for my career and my business with clients. I want to see it become an important real-time communication service. The VRS is for me closer to functional equivalency than other telecommunications service. PLEASE DO NOT allows the FCC to further reduce the VRS rate of reimbursement until it becomes available 24/7 with high quality services and accessibility. PLEASE also overturn FCC's decision refusing reimbursement for video mail.

Thank you,

Michael Hays

5280	John	Levesque	deafjax@juno.com	7/22/2004	148 Maxwell Road	Monson	MA	01057	As a cultural minority in this great country, all public and private systems need to be accessible to all people with hearing loss. The Deaf use American Sign Language as their primary mode of communication and thus, VRS is extremely important for all of us to main in contact with each other in each's own mother language. This is our "civil rights" act and one that everyone should support. It is up to us to share with you what our choices are and please open your "ears" and listen to what we consider important to "remain" mainstreamed in the USA and be immersed. Thank you, Jax Levesque

5282	Kathleen	Lerch	drierch@aol.com	7/22/2004	734 High Cliff Trail	Madison	WI	53718	As a consumer of VRS I am concerned that access to the service be available 24 hours a day/7 days a week. It is critical that we have equal access to communication that is available to any other citizen. If we are to support this consistently across the country, it seems logical that funding from state/federal sources will provide that security. Companies that support the service need to reasonably afford to provide it. For example, in order to provide adequate service, industry standards/regulations for VRS operators needs to be established to support necessary ergonomics, language skills and technical skills. Operators/interpreters need relief/support to manage the volume and types of calls that come in. If an operator is interpreting a legal call and does not have adequate understanding of the language s/he is interpreting, then communication access is compromised. Adequate support in call centers needs to be addressed in order to meet the needs. Funding and regulations will help to guarantee the reliability of this service.

Yes,it should be mandate for Video Relay service as I am support that Video Relay Service keeps open service for the deaf and hard of hearing people to request to have it so badly and it would be more easier for them to communicate on Video Relay Service on broadband devices by their own internet provide service ad want to use video conferencing all the time while people need to call someone also possible for 911.Please keep onVideo Relay service to make a mandate truth. 									As a school Teacher and Nationally Certified Interpreter I have direct knowledge related to "therapeutic effect " video relay has on young deaf children and teens unable to successfully access English text. This service develops natural language skills. It uses "authentic voice" to empower members of the deaf community to "speak for them selves, "face to face."
									Video relay removes the intimidation of technological communication and removes the stigma of low self-esteem. It clarifies the messenger 's discourse previously distorted and misunderstood due to English-only based text communication.

5576	Lyn	Wiley	lynjwiley@aol.com	7/27/2004	6715 40th Ave. SW	Seattle	WA	98136	I am happy to have the opportunity, as a deaf adult, to sign this petition. The quality of life for countless people hinges, to a degree, on the availability of special services/devices just as those who have impaired vision rely on their special services and devices. THANK YOU for the opportunity to express myself relative to this issue regarding VRS services which are vital to those of us who live with limited hearing or total hearing loss.

I also like to add that we, the deaf people, have the right to access to our needs of communication that includes in the workplaces, homes, doctors, offices and many more. In addition, my families feel that VRS has a better quality and faster service than TRS. At the end, do not take away this opportunity.

Compared to the TTY based rely, this VRS service is a huge leap towards functional equivalency. Businesses and customer service reps who hang up on TTY relay services because of the wait for the typing to process do NOT hang up on VRS because communication is ongoing and the delay due to the VRS facillitating communication is almost nil. I support this wholeheartedly.

VRS is an important media for us to call someone to communicate our messages. VRS is available and it must be a mandated requirement by FCC to allow options to communicate by the Deaf and Hard of Hearing. In the long run, VRS is faster and cheaper than using the TTY over the telephone. I am sure you would agree this is the way to go. Please support us having a 24 hour/7 days a week VRS availability.
Thank you.

6215	C	Zuckerman	czasl@netrox.net	8/21/2004	3111 Carambola Cir South	Coconut Creek	FL	33066	VRS is truly the next best thing to a conversation in person, and allows ASL users to use their "native" language for communication, with fewer problems. I use ASL and English both well, but find that the communication with traditional relay (and typing in ENGLISH) often gets scrambled!!
